

SGS QUALIFOR

FOREST MANAGEMENT STANDARD FOR TANZANIA 2011

This checklist presents the SGS Qualifor standard for forest certification against the FSC Principles and Criteria. This standard forms the basis for:

- Development of a regional standard
- Scoping assessment
- Certification assessment
- Surveillance assessment
- Information to stakeholders on the assessment criteria used by SGS Qualifor

CHANGES SINCE THE PREVIOUS VERSION OF THE STANDARD

Section	Change	Date
Throughout	Changes indicated with grey highlighting	25 July 2011

ADAPTATION OF STANDARD TO MEET LOCAL REQUIREMENTS AND THRESHOLDS

The objective of local adaptation of the SGS Qualifor standard is to:

- i. identify any aspects of the standard that may be in conflict with legal requirements in the area in which the standard is to be used, and if such a conflict is identified shall evaluate it for the purposes of certification in discussion with the involved or affected parties. Conflict only occurs where a legal obligation *prevents the implementation of* some aspect of the generic standard. It is not considered a conflict if the requirements of the generic standard exceed the minimum requirements for legal compliance;
- ii. identify any aspects of its generic standard, which specify performance thresholds lower than the minimum legal requirement in the country concerned. If any such differences are identified the relevant thresholds shall be modified to ensure that they meet or exceed the minimum national requirements.
- add specific indicators (with appropriate means of verification if required) and/or crossreferences to the identified documentation to evaluate compliance with key requirements of the national and local forest laws, administrative requirements and multi-lateral environmental agreements related to the FSC Principles 1 - 10.
- iv. take account of the national context with regards to forest management;
- v. take account of national environmental, social and economic perspectives;
- vi. ensure that the standard is applicable and practical in the country concerned;
- vii. ensure that the standard is applicable and practical to the size and intensity of management of the Forest Management Unit concerned;
- viii. address specific issues that are of general concern to any stakeholder group in the country concerned.

SGS QUALIFOR is not required to seek or develop a consensus with regard to the modification of our generic standard. SGS Qualifor will however make meaningful accommodation of stakeholder concerns and will be guided in this by:

- our knowledge of the indicators and means of verification that have been included in other, FSC-accredited, regional, national or sub-national standards, with regard to the issues raised;
- advice provided in writing by the FSC National Initiative in the country concerned as to the likelihood that a proposed modification would have the support of the majority of the members of each chamber of an FSC working group active in that country;
- iii. advice provided in writing by an FSC Regional Office covering the country concerned, as to the likelihood that a proposed modification would have the support for the majority of FSC members of each chamber in the region.
- iv. the scale and intensity of forest management.

SGS QUALIFOR should be able to demonstrate that the requirements of the locally adapted generic standard are broadly in line with the requirements of other FSC-accredited national standards applicable to similar forest types in the region, and with any guidance received from an FSC National Initiative in the country concerned.

SGS Qualifor is not required to make further changes to the locally adapted standard used for an evaluation during the period of validity of the certificate except as necessary to bring it into compliance with any FSC Policies, Standards, Guidance or Advice Notes subsequently approved by FSC.

LAYOUT OF THE STANDARD:

The standard follows the FSC Principles and Criteria of Forest Stewardship (January, 2000). The Standard is divided into 10 sections, each corresponding to one of the FSC principles with the criteria listed underneath each principle. Refer to the diagramme on the next page for further clarification.

Each page of the standard is divided into 3 columns. The standard also serves as the checklist that is used during an assessment and for every criterion the following is provided:

The Qualifor Requirement: Indicator All local adaptations or additions are indicated in red.	This outlines the norm or indicators that Qualifor requires for compliance with the specific FSC criterion. A potential source of information or evidence that allows an auditor to evaluate compliance with an indicator. Some indicators make a distinction between the requirements for "normal" forests and SLIMF operations (Small and Low Intensity Managed Forests).	
Verifiers	Verifiers are examples of what the SGS assessor will look for to ascertain if the specific norm or indicator has been met. This list is not exhaustive and the assessor may use other means of verifying the relevant indicator.	
Guidance The FSC Principle	Guidance is written in <i>italics</i> and assists the assessor in understanding the requirement of the specific indicator.	
PRINCIPIZI. COMMUNITY RELA	TIONS AND WORKER'S RIGHTS: The FSC Criterion	
Forest management operations shall maintain or enhance the long-term social and e nomic well being of forest workers and local communities.		
	hin, or adjacent to, the forest management area should be or employment, training, and other services	
Indicator 4.1.6	Verifiers & Guidance:	
Policies and procedures and the implementation thereof make qualifications, skills and experience the basis for recruitment, placements	culture, sex, age, religion, political opinion, national extraction or	
training and advancement of staff at all levels	Employment policies and procedures.	
<u>SLIMF:</u>		
Employees are not discriminated in hiring.	Interviews with Forest Managers, workers and Labo Inion representatives.	
Employees are not discriminated in hiring, advancement, dismissal remuneration and	representatives.	
	representatives.	

AD 33-TZ-03

THE STANDARD

PRINCIPLE 1.COMPLIANCE WITH LAWS AND FSC PRINCIPLES:

Forest management shall respect all applicable laws of the country in which they occur and international treaties and agreements to which the country is a signatory, and comply with all FSC Principles and Criteria

Criterion 1.1 Forest management shall respect all national and local laws and administrative requirements

Indicator 1.1.1	Verifiers & Guidance:
There is no evidence of significant non- compliance with all national and local laws and administrative requirements	Interviews with and information supplied by regulatory authorities, other stakeholders and Forest Managers.
	Control of required legal documentation. policies, operational procedures and standards demonstrate compliance with requirements.
	SLIMF:
	The forest manager knows what the legislation requires.
	Field observation and documentation available show that legislation is being complied with in-field.
	A legal non-compliance will be considered "significant" if:
	 it has been allowed to persist or remain for a period of time that would normally have allowed detection; and/or
	 ii. it is an intentional or a blatant/self-evident disregard for the law.
	A legal non-compliance will not be considered "significant if the deviation is short-term, unintentional and without significant damage to the environment.
	See Appendix A for a list of all the applicable laws, regulations and guidelines. Specifically check the following:
	A Company must be formally registered in terms of the Companies Act, 2002.
	Concessions must be valid in terms of the Forests Act, 2002 and concession conditions must be met.
Indicator 1.1.2	Verifiers & Guidance:
Forest managers shall demonstrate awareness	Interviews with Forest Managers and field observations.
and compliance with relevant codes of practice, operational guidelines and other accepted norms or agreements.	List of applicable laws, regulations and national guidelines.
	See Appendix A for list of the applicable Tanzanian laws,

Criterion 1.2 All applicable and legally prescribed fees, royalties, taxes and other charges shall be paid

policies and guidelines.

Indicator 1.2.1	Verifiers & Guidance:
There is evidence that required payments have	Invoices, tax returns, receipts.

been made.	Interviews with and information supplied by regulatory authorities and other stakeholders.	
	No evidence of non-payment	
	Check levies payable under the Forest Act, 2002.	
Indicator 1.2.2	Verifiers & Guidance:	
Provision has been made to meet the costs of	Specific provisions in financial planning and long-term budgets.	
future fees	<u>SLIMF:</u>	
	Forest manager can explain how future costs will be provided for.	
Criterion 1.3 In signatory countries, the provisions of all the binding international agreements such as CITES, ILO conventions, ITTA, and Convention on Biological Diversity, shall be respected.		
Indicator 1.3.1	Verifiers & Guidance:	
There is awareness and implementation of the	Interviews with Forest Managers	
requirements of the Convention of International Trade in Endangered Species (CITES) and	Operational documentation	
controls in place to ensure continuing	Required licenses are in place	
compliance with such <u>SLIMF:</u> There is awareness of any local species that are covered by the requirements of the Convention of International Trade in Endangered Species (CITES) and controls in place to ensure continuing compliance with such	Tanzania is not signatory to CITES, however the provisions of CITES are generally reflected in national legislation such as 1) Plant Protection Act, 1997; 2) Environmental Management Act, 2004; 3) Forest Act, 2002; 4) Environmental Policy 1997; 5) Wildlife Policy, 1998, 6) National Forest Policy, etc.	
Indicator 1.3.2	Verifiers & Guidance:	
Forest Managers are aware of the requirements and have implemented controls to ensure	Interviews with Forest Managers, workers, contractors, labour unions and regulatory authorities.	
continuing compliance with the International Labour Organisation (ILO) conventions that	Review of policies, procedures and personnel records.	
apply to their operations. ILO 87 and 98 are	<u>SLIMF:</u>	
minimum requirements for certification. SLIMF:	Forest Managers are aware of the requirements and there is no objective evidence of non-compliance.	
Forest Managers are aware of and have implemented controls to ensure continuing compliance with national legislation relating to labour matters	Tanzania is a signatory to ILO. Current legislation encapsulates certain requirements of ILO (see Appendix A).	
Indicator 1.3.3	Verifiers & Guidance:	
(Not applicable to SLIMF) Forest Managers are aware of the requirements and have implemented controls to ensure continuing compliance with ITTA.	Interviews with Forest Managers, regulatory authorities and other stakeholders.	
	Review of policies, procedures and records	
	Tanzania is signatory to the International Tropical Timber Agreement (ITTA), and a member of the organisation (ITTO). Members are encouraged to support and develop industrial tropical timber reforestation and forest management activities as well as rehabilitation of degraded forest land, with due regard for	

	the interest of local communities dependent on forest resources	
Indicator 1.3.4	Verifiers & Guidance:	
(Not applicable to SLIMF) Forest Managers are aware of the requirements	Interviews with Forest Managers, regulatory authorities and other stakeholders.	
and have implemented controls to ensure	Review of policies, procedures and records.	
continuing compliance with the International Biodiversity Convention.	Tanzania is a signatory to International Biodiversity Convention. The three objectives of the Convention are: the conservation of biodiversity, the sustainable use of biological resources and the fair and equitable sharing of benefits arising from the use of genetic resources.	
	gulations and the FSC Principles and Criteria shall be of certification, on a case-by-case basis, by the or affected parties	
Indicator 1.4.1	Verifiers & Guidance:	
Any identified conflicts are brought to the attention of SGS and involved or affected	SGS will assess the conflict and advise on resolution thereof, where such were possible.	
parties.	Interviews with Forest Managers and other stakeholders.	
Criterion 1.5 Forest management areas should be protected from illegal harvesting, settlement and other unauthorised activities		
Indicator 1.5.1	Verifiers & Guidance:	
Forest Managers have taken reasonable measures to monitor, identify and control illegal	Field observations show no damage from unauthorised or illegal activities	
harvesting, settlement and other unauthorised activities.	Manager's explanation of protection/ prevention activities e.g. signs, gates, patrols, etc	
	Copies of reports made to the authorities of problem activities	
	Boundaries are known to the manager and local communities and are easily identified in the field.	
	Boundaries are marked in areas where there is a high risk of encroachment.	
	Unauthorised activities include bee-keeping, illegal grazing, illega wood collection/harvesting.	
Indicator 1.5.2	Verifiers & Guidance:	
There are adequate personnel and surveillance resources to control such activities	Field observations provide no evidence of ongoing illegal activities	
	Check percentage of forest protection posts on staff establishment that have been filled and Budget allocated to forest protection (cost per ha).	
	onstrate a long-term commitment to adhere to the FSC	
Principles and Criteria	Varifiara & Guidanaa	
Indicator 1.6.1	Verifiers & Guidance:

The forest manager has plans to manage the	Past management has been compatible with the P&C
forest in the long term in a way that is compatible with the FSC Principles and Criteria	
Indicator 1.6.2	Verifiers & Guidance:
(Not applicable to SLIMF)	Interviews with Forest Managers, workers and stakeholders.
The policy is communicated throughout the organisation (including to contractors) and to external stakeholders	Evidence of distribution of policy to stakeholders.
Indicator 1.6.3	Verifiers & Guidance:
Where the owner/manager has some responsibility for forest lands not covered by the certificate, then there is a clear long term commitment to managing all forests in the spirit of the FSC P&C	The applicant for certification must make a full disclosure of all forest areas over which the applicant has some responsibility, whether as owner (including share or partial ownership), manager, consultant or other responsibility. The disclosure shall be documented in the main assessment report. You must record full details of ownership, forest name, type, area and location for each such forest. This information must be made available to stakeholders as part of the consultation process.
	When the evaluation does not include all the forest areas in which the applicant is involved, the applicant must explain the reasons for this, and the reasons must be documented in the main assessment report.
	Evidence of such other forest lands.
	Policies
	Interviews with Forest Managers.
Indicator 1.6.4	Verifiers & Guidance:
Management of forest areas identified under 1.6.4 complies with the latest FSC Partial Certification Policy	Interviews with Forest Managers, policies, procedures and field observations.
PRINCIPLE 2. TENURE AND RIGHTS R	
Long-term tenure and use rights to the land documented and legally established.	and forest resources shall be clearly defined,
Criterion 2.1 Clear, long-term tenure and forest use rights to the land (e.g. land title, customary rights or lease agreements) shall be demonstrated	
Indicator 2.1.1	Verifiers & Guidance:
There is documentation showing the	Documentation with appropriate legal status.
owner/manager's legal rights to manage the land and/or utilise forest resources	Maps clearly indicating the boundaries of the FMU.
	Relevant legislation: The National Forest Policy (1998) & National Forest Act (2002), The Land Policy (1997), The Land

'age	9	of	55

Indicator 3.1.2	Verifiers & Guidance:	
Rights identified in terms of Indicator 3.1.1 are respected.	Consultation with representatives of indigenous peoples.	
Indicator 3.1.3	Verifiers & Guidance:	
There is documented evidence that free and informed consent has been given by affected	Affected communities should have the financial, technical and logistical capacity to enable "free and informed consent"	
communities to allow forest management activities that may affect their use rights of the	Consultation with representatives of indigenous peoples.	
FMU.	No evidence of disputes.	
	Evidence that agreed payments for use right and/or resources are being made.	
Criterion 3.2 Forest management shall not threaten or diminish, either directly or indirectly, the resources or tenure rights of indigenous peoples		

Indicator 3.2.2	Verifiers & Guidance:
Any impacts of forest management on indigenous communities' resources or tenure rights are identified and known by the Forest Manager	
SLIMF:	
Any impacts of forest management on indigenous communities' resources or tenure rights are identified and recorded	Records or impact assessments. Consultation with representatives of indigenous peoples
Indicator 3.2.1	Verifiers & Guidance:

Indicator 3.2.2	Verifiers & Guidance:
Indigenous peoples are explicitly informed of	Records of meetings.
any impacts that forest management may have on their resources or tenure tights	Consultation with indigenous peoples

Indicator 3.2.3	Verifiers & Guidance:	
Forest Management will not proceed without clear evidence of the free and informed consent of the indigenous peoples claiming such land, territory or customary rights, accepting impacts identified in terms of Indicator 3.2.1. Where disputes arise post facto, operations affecting these rights will be suspended until such dispute had been resolved	Consultation with representatives of indigenous peoples. Records of dispute resolution	
Indicator 3.2.4	Verifiers & Guidance:	
Actions are taken to prevent or mitigate adverse impacts	Field inspections and records of corrective actions	
Criterion 3.3 Sites of special cultural, ecological, economic or religious significance to indigenous peoples [and other sections of the community] shall be clearly identified in co-operation with such peoples, and recognised and protected by forest managers.		
Indicator 3.3.1	Verifiers & Guidance:	
Sites of special cultural, historical, ecological, economic or religious significance are identified, described and mapped in co- operation with affected or interested stakeholders. SLIMF:	Interviews with Forest Managers and consultation with stakeholders. Records and maps. Refer also to Indicator 7.1.1	
Sites of special cultural, historical, ecological, economic or religious significance have been identified and any special requirements are known.		
Indicator 3.3.2	Verifiers & Guidance:	
Management objectives and prescriptions are developed (and documented) in co-operation with affected or interested stakeholders <u>SLIMF:</u> Clear management objectives have been identified.	Management plans and documents. Consultation with stakeholders <u>SLIMF:</u> Interviews with the Forest Manager and field observations	
Indicator 3.3.3 Such areas are identified in working plans and demarcated in the field where this is considered appropriate	Verifiers & Guidance: Operational plans and maps and field observation	
Indicator 3.3.4	Verifiers & Guidance:	
All operators and contractors can identify such sites in the field and measures are in place to prevent any form of damage or disturbance,	Interviews with operators and field observations. Consultation with stakeholders	

other than such agreed with stakeholders.	
Indicator 3.3.5	Verifiers & Guidance:
Rights of access to these areas is permitted	Consultation with stakeholders
Criterion 3.4 Indigenous peoples shall be compensated for the application of their traditional knowledge regarding the use of forest species or management systems in forest operations. This compensation shall be formally agreed upon with their free and informed consent before forest operations commence.	
Indicator 3.4.1	Verifiers & Guidance:

PRINCIPLE 4. COMMUNITY RELATIONS AND WORKER'S RIGHTS:

Forest management operations shall maintain or enhance the long-term social and economic well being of forest workers and local communities.

Criterion 4.1 The communities within, or adjacent to, the forest management area should be given opportunities for employment, training, and other services

Indicator 4.1.1	Verifiers & Guidance:
People in local communities are given	Interviews with Forest Managers and workers.
opportunities in employment, training and contracting	Consultation with representatives of local communities and labour unions.
SLIMF:	Training strategies.
Local workers and contractors should be used	Job advertisements in local publications
wherever possible	See The National Employment Policy and Employment and Labour Relations Act, 2004
Indicator 4.1.2	Verifiers & Guidance:
In large scale organisations, contracts are	Interviews with contractors.
awarded through a transparent process on the basis of clear criteria; justification for final	Policies and procedures of the assessed organisation.
selections is documented	Documentation on contracting of services.
Indicator 4.1.3	Verifiers & Guidance:
In <u>large scale organisations</u> training and/or other appropriate forms of assistance to local people and workers to meet the organisation's	Workers include: employees, contractors, sub-contractors, and any other persons carrying out forestry work on the forest management unit.
long-term staffing requirements are developed	Long-term training plans.
and supported	Interviews with Forest Managers and workers.
	See Employment and Labour Relations Act, 2004 & National Employment Policy; Education and Training Policy
Indicator 4.1.4	Verifiers & Guidance:
(Not applicable to SLIMF) Support is provided for local infrastructure and facilities at a level appropriate to the scale of the forest resources	Service provision and support for local infrastructure, facilities should, as a minimum, be consistent with meeting management plan objectives over the long term (e.g. provision of basic health, education and training facilities where these do not exist) as well as avoiding or mitigating any negative social impacts of the operations.
	Consultation with representatives of local communities
	Provision of training; schooling; medical; facilities; housing; accommodation
Indicator 4.1.5	Verifiers & Guidance:
Where practicable, communities are given	Interviews with Forest Managers and local communities.
controlled access to forest and non-forest products on the FMU	Evidence of controlled harvesting activities

Indicator 4.1.6	Verifiers & Guidance:
Policies and procedures and the implementation thereof make qualifications, skills and experience the basis for recruitment,	No evidence of discrimination on the basis of: race, colour, culture, sex, age, religion, political opinion, national extraction or social origin
placement, training and advancement of staff at all levels	Employment policies and procedures.
SLIMF:	Interviews with Forest Managers, workers and Labour Union representatives.
Employees are not discriminated in hiring, advancement, dismissal remuneration and	SLIMF:
employment related to social security	Interviews with workers and contractors
Indicator 4.1.7	Verifiers & Guidance:
All employees, contractors and sub-contractors must be paid a fair wage and other benefits,	Benefits may include social security payments, pension, accommodation, food, etc.
which meet or exceed all legal requirements and those provided in comparable occupations	Records of payment
in the same region	Interviews with Forest Managers, workers and Labour Union representatives.
	According to http://en.wikipedia.org/wiki/List of minimum wages by country
	minimum wages in Tanzania are set by categories covering eight employment sectors; ranges from 65,000 <u>Tanzanian shillings</u> per month for hotel workers to 350,000 shillings per month for the mineral sector
Indianter 4.1.0	
Indicator 4.1.8	Verifiers & Guidance:
Indicator 4.1.8 No workers should be engaged in debt bondage or other forms of forced labour	Verifiers & Guidance: Interviews with Forest Managers, workers and Labour Union representatives
No workers should be engaged in debt bondage	Interviews with Forest Managers, workers and Labour Union
No workers should be engaged in debt bondage	Interviews with Forest Managers, workers and Labour Union

Interviews with Forest Managers, workers and Labour Union representatives Observations in the work place. Verifiers & Guidance: Where children and young persons are to be removed from employment in order to comply with this requirement, criterion 4.4 on social impact assessment and mitigation will apply. Organisations are expected to carry out a social impact assessment of the displacement of children from the workplace and effectively mitigate that impact e.g. provide suitable alternative sources of family income and ensure the children

	<u>I</u> meet or exceed all applicable laws and/or regulations of employees and their families
Indicator 4.2.1	Verifiers & Guidance:
Forest Managers are aware of laws and/or regulations covering heath and safety of employees and their families and comply with such. For <u>large scale organisations</u> a written safety and health policy and management system are in place	Forestry operations should follow the ILO Code of Practice on Safety and Health in Forestry.
	Interviews with Forest Managers, workers and union representatives.
	Guidelines/regulations are readily available.
	Labour directives and inspection reports.
	Company OHS records
	See The Occupational Health and Safety Act, 2003
Indicator 4.2.2	Verifiers & Guidance:
Forest Managers have systematically assessed the risk associated with all tasks and equipment	Interviews with Forest Managers, workers and union representatives.
and prescribed appropriate safe procedures, the use of personal protective equipment (PPE),	Documented risk assessments.
emergency procedures and , key	SLIMF:
responsibilities.	Equipment is available to workers
In <u>large scale organisations</u> , compliance with this requirement shall be supported by	Interviews with Forest Managers and workers
documentation	Field observations
SLIMF: All work done in the forest must comply with health and safety laws and regulations	Specifically see the ILO Technical guidelines for Safety and health at the Forestry Worksite, 12 General provisions, and clauses 243-276.
	Risk assessment should include risks of exposure of workers to excessive UV radiation (ILO CoP on S&H in Forestry Work, 1998)
Indicator 4.2.3	Verifiers & Guidance:
All workers have had relevant training in safe	Interviews with Forest Managers and workers.
working practice and where required, hold the necessary skills certificates.	Training schedules and records
necessary skins certificates.	Copies of skills certificates.
Indicator 4.2.4	Verifiers & Guidance:
Forestry operations comply as a minimum, with	Interviews with Forest Managers and workers
the ILO Code of Practice on Safety and Health in Forestry	Tanzania is a signatory to ILO. The FMU should have proof of access to the ILO Code of Practice on Safety and Health in Forestry Work (ILO1998).
Indicator 4.2.5	Verifiers & Guidance:
All necessary tools, machines, substances and	Interviews with Forest Managers and workers.
equipment, including appropriate PPE, are available at the worksite and are in safe and	Field observations.
serviceable condition	UV Protection provided for workers based on risk assessment.
	An adequate supply of safe drinking water must be available at the worksite. For Physical work in hot climates, 1litre per person

	per hour may be required.
	First Aid kits must be available on site and adequately equipped
Indicator 4.2.6	Verifiers & Guidance:
Managers take measures to ensure that workers	Interviews with Forest Managers and workers.
use the PPE that is provided	Field observations
Indicator 4.2.7	Verifiers & Guidance:
Health and safety records (including risk evaluations, accident records) are maintained	Records of accidents, incidents, instructions to supervisors and workers
and up-to-date	SLIMF:
SLIMF:	Records
Basic record is kept of health and safety related	Interviews with Forest Manager and workers
incidents	See The Occupational Health and Safety Act, 2003
Indicator 4.2.8	Verifiers & Guidance:
All employees and contractors and their	Interviews with Forest Managers and workers
families have access to adequate local medical facilities while working on the FMU.	Medical care should be provided if public health services are not available in the area where the workers and their families live.
	First aid kits at the worksite should be well maintained, clearly marked and protected against moisture and debris. There must be trained first aid personnel at the worksite.
Indicator 4.2.9	Verifiers & Guidance:
Where located and provided on the FMU worker	Interviews with Managers and workers
accommodation and nutrition comply, as a	Inspection of facilities
	Inspection of facilities Check Section 10, page 42 of the ILO Code of Practice on Safety and Health in Forestry Work (ILO1998).

Criterion 4.3 The rights of the workers to organise and voluntarily negotiate with their employers shall be guaranteed as outlined in Conventions 87 and 98 of the International Labour Organisation (ILO).		
Indicator 4.3.1	Verifiers & Guidance:	
Workers are free to organise and or join a trade union of their choice without fear of	Interviews with Forest Managers, workers and labour union representatives.	
intimidation or reprisal. This will at a minimum comply with the requirements of the ILO Convention No. 87: Convention concerning	Proof of access to ILO Convention No. 87 and Employment & Labour Relations Act, 2004.	
Freedom of Association and Protection of the Right to Organise	Check that labour unions are included on the stakeholder's list (see 4.4.3).	
Indicator 4.3.2	Verifiers & Guidance:	
Workers are free to organise and bargain collectively. This will at a minimum comply	Interviews with Forest Managers, workers and labour union representatives	
with the requirements of International Labour Organisation convention 98, Convention concerning the Application of the Principles of the Right to Organise and to Bargain Collectively	Proof of access to ILO Convention No. 98.	
Indicator 4.3.3	Verifiers & Guidance:	
There is an effective mechanism in place to provide information to, and enable the participation of workers in decision-making where this directly affects their working terms and conditions	Interviews with Forest Managers, workers and labour union representatives	
SLIMF: Workers or their representatives are accepted as participants in decision making		
Criterion 4.4 Management planning and operations shall incorporate the results of evaluations of social impact. Consultations shall be maintained with people and groups directly affected by management operations.		
Indicator 4.4.1	Verifiers & Guidance:	
In conjunction with the local stakeholders affected and in accordance with the scale and intensity of management, the social, socio- economic, spiritual and cultural impacts of forest operations are evaluated.	New operations will normally be subjected to formal impact assessments and these assessments must include the social environment. For ongoing operations it will be necessary to maintain communication with stakeholders and thus ensure the Forest Manager is aware of any current and/or potential impacts. Management plans must provide mitigatory measures	
For <u>large scale organisations</u> , these impacts shall be documented	to address such impacts, e.g. problems with dust or noise caused by operations are known and planning is adjusted to reduce or negate such	
SLIMF (Small Forests):	Interviews with Forest Managers and local communities.	
Anyone who is likely to be directly affected by an operation is informed and has an opportunity	SLIMF (Small Forests):	
to comment.	Discussions with neighbours and forest manager	
The forest manager must try to avoid negative impacts of operations.	Copies of newspaper advertisements, letters, posters and signs used to inform people of operations.	
SLIMF (Low Intensity Forests):	SLIMF (Low Intensity Forests):	
The forest manager proactively seeks		

assistance from external organizations to carry out an assessment of social impacts and/or social impact monitoring and uses the results to plan future management.	Copies of Social Impact Assessment reports Evidence of changes in management following results of an Social Impact Assessment <u>or</u> monitoring of social impacts.
Indicator 4.4.2	Verifiers & Guidance:
(Not applicable to SLIMF)	Interviews with Forest Managers and local communities.
Adverse impacts, opportunities for positive impact and areas of potential conflict identified by evaluations are adequately addressed in plans	Management plans
Indicator 4.4.3	Verifiers & Guidance:
	Records
An up-to-date list of stakeholders is maintained	Consultation with stakeholders
Indicator 4.4.4	Verifiers & Guidance:
(Not applicable to SLIMF)	Records
There is adequate and ongoing consultation with stakeholders (local people, workers and	Consultation with stakeholders and interviews with Forest Managers
relevant organisations); in particular,	National Forest Act, 2002 and National Forest Policy, 1998
stakeholders are aware that forest management plans and monitoring results are available for inspection, if high impact operations are planned, and that the FMU is being evaluated/monitored for certification	FAO: Local communities or indigenous peoples living near the harvesting site should be consulted about the planned harvesting operations, including any potential scheduling problems or opportunities (for instance, ready labour availability during slack agricultural periods).
Indicator 4.4.5	Verifiers & Guidance:
Issues raised by stakeholders are treated	Records
constructively and objectively	Consultation with stakeholders and interviews with Forest Managers
Indicator 4.4.6	Verifiers & Guidance:

In <u>large scale operations</u> , communications with stakeholders on issues that require action and follow-up should be documented	Documentation of communication
Criterion 4.5 Appropriate mechanisms shall be employed for resolving grievances and for providing fair compensation in the case of loss or damage affecting the legal or customary rights, property, resources or livelihoods of local peoples. Measures shall be taken to avoid such loss or damage	
Indicator 4.5.1	Verifiers & Guidance:
Every effort is made to resolve disputes through	Records
fair consultation aimed at achieving agreement and consent	Consultation with stakeholders and interviews with Forest Managers

circumstances where conv a) entails a very limit b) does not occur on c) will enable clear, s	ations or non-forest land uses shall not occur, except in version: ted portion of the forest management unit; and high conservation value forest areas; and substantial, additional, secure, long-term conservation e forest management unit.
Indicator 6.10.1	Verifiers & Guidance:
Forest conversion, if any, is limited to small areas (and its extent is acceptable to conservation organisations, regulatory authorities) and/or is of negligible environmental impact	Clear felling and replanting of a natural or semi-natural forest with a mixture native species in the absence of satisfactory natural regeneration is not considered forest conversion to plantation. Clear felling and replanting of a natural or semi- natural forest with an exotic species is considered conversion.
	The clearance of isolated single trees or pockets of natural vegetation less than 0.001 ha to consolidate plantation blocks o for essential infrastructure development is only permitted where acknowledged experts and regulatory authorities have been consulted and find it acceptable.
	Interviews with Forest Managers, local experts and government agencies.
	Plans and maps.
	Field observations.
Indicator 6.10.2	Verifiers & Guidance:
Conversion and aforestation do not occur in conservation zones, protection areas (see 6.2)	Interviews with Forest Managers, local experts and government agencies.
or areas retained as representative of existing ecosystems (see 6.2)	Plans and maps.
,	Field observations.
Indicator 6.10.3	Verifiers & Guidance:
Conservation benefits of conversion to non-	Conversion may, for example, have a net conservation benefit where an area is converted back to its original natural or semi-
forest land use or aforestation or compensatory conservation activities planned have been identified and assessed in cooperation with	natural habitat type such as open wetland or grassland. Interviews with Forest Managers, local experts and government

acknowledged experts; in the case of compensatory conservation activities, their	agencies.

Conservation benefits are substantial,	Scientific evidence and interviews with Forest Managers and		
additional, secure, and long term	local experts		
PRINCIPLE 7. MANAGEMENT PLAN:			
A management plan - appropriate to the scale and intensity of the operations - shall be written, implemented, and kept up to date. The long-term objectives of management, and the means of achieving them, shall be clearly stated.			
Criterion 7.1 The management plan and	supporting documents shall provide:		
a) management ob	jectives;		
	description of the forest resources to be managed, environmental limitations, land use and ownership status, socio-economic conditions, and a profile of adjacent lands;		
c) rationale for rate	rationale for rate of annual harvest and species selection;		
d) provisions for m	d) provisions for monitoring of forest growth and dynamics;		
e) environmental s	e) environmental safeguards based on environmental assessments;		
f) plans for the ide species;	, , , , , , , , , , , , , , , , , , , ,		
 g) maps describing the forest resource base including protected areas, planned management activities and land ownership; 			
 h) description and justification of harvesting techniques and equipment to be used. 			
Indicator 7.1.1	Verifiers & Guidance:		
There is a management plan (or overview	Management plan		
linking different planning documents)	SLIMF:		
SLIMF: Management plans may consist of brief notes	Checking the plan exists and contains all the information required.		
and a map	Field checks that the plan has been implemented in the past and is currently still followed.		
	See National Forest Act (2002) & National Forest Policy (1998)

Public Summary of Management Plan
<u>SLIMF:</u>
Management Plan is available

PRINCIPLE 8. MONITORING AND ASSE	SSMENT:
Monitoring shall be conducted - appropriate to the scale and intensity of forest management - to assess the condition of the forest, yields of forest products, chain of custody, management activities and their social and environmental impacts.	
complexity and fragility of frequency and intensity of	forest management operations as well as the relative the affected environment <u>should</u> determine the monitoring. Monitoring procedures <u>should</u> be over time to allow comparison of results and
Indicator 8.1.1	Verifiers & Guidance:
All activities that require monitoring are identified.	Interviews with Management and environmental specialists/stakeholders
For large scale organisations these shall be	Monitoring programme
documented in a monitoring programme.	Environmental Monitoring includes:
	• <u>Key</u> RT&E species identified from the list identified in terms of C6.2.
	Condition of natural habitats over time.
	Monitoring of river health
Indicator 8.1.2	Verifiers & Guidance:
The frequency, intensity and expense of	Monitoring programmes
monitoring are defined and is appropriate to the	SLIMF:
scale and intensity of the forest management	Manager's field notes
operations and the sensitivity of the receiving environment	Manager's description of how monitoring is done.
SLIMF:	
Monitoring should be done in a consistent and replicable way over time to allow comparison of results and assessment of change.	
Indicator 8.1.3	Verifiers & Guidance:
(Not applicable to SLIMF)	Monitoring procedures
Consistent and replicable monitoring	Interviews with Forest Managers and local experts
procedures for each activity are documented in the programme and implemented, allowing for	
comparison and change over time.	
Indicator 8.1.4	Verifiers & Guidance:
Monitoring information is readily available and	Monitoring records, reports and archival system.
in a format that facilitates effective auditing and	Internal audit records
certification by third parties	CAR records
Indicator 8.1.5	Verifiers & Guidance:
	Corrective action documentation
Corrective actions identified through the monitoring process are appropriately	

implemented and closed out		
Criterion 8.2 Forest management <u>should</u> monitor, at a minimum, the	I include the research and data collection needed to following indicators:	
 yield of all forest products harvested; 		
 growth rates, regeneration and condition of the forest; 		
 composition and observed 	I changes in the flora and fauna;	
 environmental and social i 	impacts of harvesting and other operations;	
 costs, productivity, and ef 	ficiency of forest management.	
Indicator 8.2.1	Verifiers & Guidance:	
Yields of all forest products harvested are recorded	Harvesting records	
Indicator 8.2.2	Verifiers & Guidance:	
A timber resource inventory is conducted, appropriate to the scale and intensity of forest management	Data are collected on growth rates, regeneration, and yield of all forest products harvested as well as the condition of the forest (data accuracy is appropriate to scale and intensity of management)	
SLIMF:	Documented inventory	
The manager knows what information they need in order to judge progress towards their	SLIMF:	
objectives. The information is collected and	Discussions with forest manager.	
recorded. In all cases this will include:	Evidence of the manager's knowledge of the forest and proactive approach to field observation and field notes	
Amount of products harvested	Review of manager's field notes, observations or reports on	
Effects of operations as identified under C6.1	HCVs.	
Changes in features identified under C6.2	Available maps and reports from other sources	
 At least annual monitoring of high conservation values identified under C 9.1 		
Invasive exotic species

Criterion 8.5 While respecting the confidentiality of information, forest managers shall make publicly available a summary of the results of monitoring indicators, including those listed in Criterion 8.2.		
Indicator 8.5.1	Verifiers & Guidance:	
Results and/or summaries of monitoring programmes (including those listed in Criterion 8.2) are available to the public within the accepted norms of commercial confidentiality.	Public summary	
Regular summaries of monitoring results and analysis by FMU are available to the public.		
SLIMF:		
Refer Indicator 7.4.1		
PRINCIPLE 9.MAINTENANCE OF HIGH CONSERVATION VALUE FORESTS: Management activities in high conservation value forests shall maintain or enhance the attributes, which define such forests. Decisions regarding high conservation value forests shall always be considered in the context of a precautionary approach.		
Criterion 9.1 Assessment to determine the presence of the attributes consistent with High Conservation Value Forests will be completed, appropriate to scale and intensity of forest management		
Indicator 9.1.1	Verifiers & Guidance:	
The FMU has been adequately assessed (in consultation with conservation organisations, regulatory authorities and other local and national stakeholders) and any HCVFs and their biological and/or socio-economic or cultural attributes have been identified <u>SLIMF:</u> The FMU has been adequately assessed (in consultation with conservation organisations and regulatory authorities) and any HCVFs and their biological and/or socio-economic or cultural attributes have been identified	 This requirement must be applied to all forests undergoing assessment. HCVFs possess one or more the following attributes: Forest areas containing globally, regionally or nationally significant concentrations of biodiversity values and/or large landscape level forests where viable populations of most/all naturally occurring species exist in natural patterns of distribution and abundance; Rare, threatened or endangered ecosystems; Forests that provide basic ecological services in critical situations (e.g. water quality or flow, protection against erosion or natural disasters such as cyclones or hurricanes, pollinators); Forests fundamental to meeting basic economic or biophysiological needs of local communities or critical to local community cultural identity. Interviews with Forest Managers and local experts. Evidence of assessments. Also see: Environmental Management Act, 2004; National Forest Act & National Forest Policy, 1998. 	
Indicator 9.1.2	Verifiers & Guidance:	
For <u>large scale organisations</u> the assessment procedure should be documented and records of consultation maintained	Documented procedures and records	

Criterion 9.2 The consultative portion of the certification process must place emphasis on the identified conservation attributes, and options for the maintenance thereof.	
Indicator 9.2.1 The owner/manager has determined appropriate management prescriptions for the HCVF in consultation with (and acceptable to) conservation organisations, regulatory authorities and other local and national stakeholders <u>SLIMF:</u> The owner/manager has determined appropriate management prescriptions for the HCVF in consultation with (and acceptable to) conservation organisations and regulatory	Verifiers & Guidance: Management plans and maps Consultation with stakeholders and/or government agencies or evidence of input by these agents
authorities.	
Indicator 9.2.2	Verifiers & Guidance:
When an HCVF has been identified for its socio- economic or cultural attributes, there should be joint analysis and decision-making with the	Interviews with Forest Managers, local experts and communities. Affected communities/persons are listed on the stakeholder list
stakeholders directly affected; all efforts should be made to establish co-management agreements with these stakeholders	(refer Criterion 4.4).
consistent with the precaut included in the publicly ava	hancement of the applicable conservation attributes tionary approach. These measures shall be specifically ailable management plan summary.
Indicator 9.3.1 All biological and/or social attributes of any HCVF identified are described in the management plan	Management plan
Indicator 9.3.2	Verifiers & Guidance:
The plan describes the specific measures to be taken to enhance the identified attributes (see also Criterion 7.1)	Management plan
Indicator 9.3.3	Verifiers & Guidance:
All measures are described in the public summary of the plan	Management plan
Indiantor 0.2.4	Verifiers & Guidance

Managers are aware of research developments which might contribute to management of HCVFs	Interviews with Forest Managers and local experts
	1
Indicator 9.4.4	Verifiers & Guidance:
Managers are actively monitoring research	Scientific evidence.
developments which might contribute to management of HCVFs	Interviews with Forest Managers and local experts
SLIMF:	
Managers are actively communicating with conservation and government agencies to access research developments which might contribute to management of HCVFs	

PRINCIPLE 10. PLANTATIONS:	
Plantations shall be planned and managed in accordance with Principles and Criteria 1 - 9, and Principle 10 and its Criteria. While plantations can provide an array of social and economic benefits and can contribute to satisfying the world's needs for forest products, they should complement the management of, reduce pressures on, and promote the restoration and conservation of natural forests.	
Criterion 10.1 The management objectives of the plantation, including natural forest conversion and restoration objectives, shall be explicitly stated in the management plan, and clearly demonstrated in the implementation of the plan.	
Indicator 10.1.1	Verifiers & Guidance:
The management plan of the plantation	"Natural forest" can be also be interpreted as natural vegetation.
explicitly states the management objectives for	Forest Management Plan
the plantation itself, as well as for natural forest conversion and restoration (see also Criterion 7.1)	Interviews with Forest Managers and local experts.
Indicator 10.1.2	Verifiers & Guidance:
The achievement of the objectives can be clearly demonstrated	Interviews with Forest Managers and local experts.
	Field observations
and conservation of natural Wildlife corridors, streamsio rotation periods, shall be us scale of the operation. Criterion 10.5 A proportion of the overall forest management area, appropriate to the scale of the plantation and to be determined in regional standards, shall be managed so as to restore the site to a natural forest cover.	
Indicator 10.5.1	Verifiers & Guidance:
There is sufficient evidence that an appropriate proportion of the overall forest management area is managed so as to restore the site to a natural forest cover. Refer Criterion 6.2	SLIMF: Field observations of conservation features Plans for future improvements
SLIMF:	
Improvements to the ecological value of the plantation are made where conservation features exist.	
biological activity. The tec construction and maintena	maintain or improve soil structure, fertility and hniques and rate of harvesting, road and trail nce, and the choice of species shall not result in long verse impacts on water quality, quantity or substantial se drainage patterns
Indicator 10.6.1	Verifiers & Guidance:
There is information on all soil types in the	Interviews with Forest Managers and local experts.
plantation area that indicate their susceptibility to degradation from forest operations and	Documented site information.
appropriate plantation species;	Evidence that site information is being used in planning of operations.
Small growers and SLIMF can demonstrate their efforts to get access to adequate information on soil types occurring within the managed area.	
Indicator 10.6.2	Verifiers & Guidance:
Where soils are degraded from previous activities, there are plans to restore them	Soil degradation through erosion, oil and chemical spills, etc. Interviews with Forest Managers and field observations.
10.6.2.1: There is evidence of measures taken to improve soil structure, fertility and biological activity.	
Indicator 10.6.3	Verifiers & Guidance:
Major water resources within the forest area are identified	Maps and interviews with Forest Managers
Indicator 10.6.4	Verifiers & Guidance:
For impacts on soil and other biophysical aspects, refer also to Criteria 6.1 and 6.5	

Criterion 10.7 Measures shall be taken to prevent and minimise outbreaks of pests, diseases, fire and invasive plant introductions. Integrated pest management shall form an essential part of the management plan, with primary reliance on prevention and biological control methods rather than chemical pesticides and fertilisers. Plantation management <u>should</u> make every effort to move away from chemical pesticides and fertilisers, including their use in nurseries. The use of chemicals is also covered in Criteria 6.6 and 6.7.		
Indicator 10.7.1		Verifiers & Guidance:
The principle fores identified.	st pests and diseases are

	<u>ganisations</u> there is regular readiness that test all	Interviews with staff and records of training.
procedures		Fire readiness and control procedures.
		See National Forest Act, 2002
Criterion 10.8 Appropriate to the scale and diversity of the operation, monitoring of plantations, shall include regular assessment of potential on-site and off-site impacts, (e.g. natural regeneration, effects on water resources and soil fertility, and impacts on local welfare and social well-being), in addition to those elements addressed in principles 8, 6 and 4. No species <u>should</u> be planted on a large scale until local trials and/or experience have shown that they are ecologically well-adapted to the site, are not invasive, and do not have significant negative ecological impacts on other ecosystems. Special attention will be paid to social issues of land acquisition for plantations, especially the protection of local rights of ownership, use or access.		
Indicator 10.8.1		Verifiers & Guidance:
For potential on-si and 6.5	ite impacts, see Criteria 6.1	

Indicator 10.8.2	Verifiers & Guidance:
(Not applicable to SLIMF)	Off-site impacts may include:
Potential biophysical off-site impacts shall be	 Spread of exotic plantation species.
monitored on a regular basis. Evidence of	 Unwanted natural regeneration of native plantation species

C.	INTERNATIONAL AGREEMENTS PERTINENT TO FORESTRY	
40.	Convention on Biological Diversity: The CBD was signed by 150 government leaders at the 1992 Rio Earth Summit and entered into force in December 1993. There are currently 188 Parties to the Agreement, including Tanzania. The three objectives of the Convention are: the conservation of biodiversity, the sustainable use of biological resources and the fair and equitable sharing of benefits arising from the use of genetic resources. The principles of the CDB are broad in scope and unlike CITES, the CBD does not contain detailed provisions on implementation. Accordingly, implementation of the CBD depends on the incorporation of the Convention and associated policies and guidelines into the national legislation of Member States.	
41.	<u>Convention on the International Trade in Endangered Species</u> (CITES): The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) was developed in the early 1970's in response to concerns that unregulated international trade in wild species of wild fauna and flora could have a detrimental impact on species and their ecosystems. It currently has 167 State Parties and regulates trade in about 30 000 species. Only a small number of these are actually endangered, the majority being species for which trade measures have been introduced to avoid conservation threat. Parties acceding to CITES agree to place controls on international trade in species that are listed in any of the Convention's three Appendices. Tanzania ia not signatory to CITES, however, regulations will still apply to the certified FMU.	
42.	International Labour Organisation (ILO): with specific reference to

45.	
44.	FOA Model Code of Forest Harvesting Practice
D.	LOCAL STANDARDS AND BEST OPERATING PRACTICES
	• Encourage members to develop national policies aimed at sustainable utilization and conservation of timber- producing forests and their genetic resources and at maintaining the ecological balance in the regions concerned, in the context of tropical timber trade.
	• Encourage members to support and develop industrial tropical timber reforestation and forest management activities as well as rehabilitation of degraded forest land, with due regard for the interest of local communities dependent on forest resources; and,
	Contribute to the process of sustainable development;
	 Provide a forum for consultation to promote non-discriminatory timber trade practices;
	 Provide an effective framework for consultation, international co-operation, and policy development among all members with regard to all relevant aspects of the world timber economy;
	The International Tropical Timber Organization (ITTO), established by the ITTA, 1983, administers the provisions and supervises the operation of this Agreement. It has the following mission statement: 'The ITTO facilitates discussion, consultation and international co-operation on issues relating to the international trade and utilization of tropical timber and the sustainable management of its resource base. Among its objectives are to:
43.	The International Tropical Timber Agreement (ITTA) was adopted on 26 January 1994 (successor agreement to the ITTA, 1983).There are currently 58 members, comprising 32 producing and 26 consuming members, including the European Community. The agreement is open to any state that produces or consumes tropical timber, and to intergovernmental organizations having responsibilities in respect of the negotiation, conclusion, and application of international agreements. The members represent 90 per cent of world trade in tropical timber and over 75 per cent of the world's tropical forests.

APPENDIX B

LIST OF RARE THREATENED AND ENDANGERED SPECIES LISTED FOR TANZANIA

The following websites provide information about Tanzania's RT&E species: www.iucnredlist.org (IUCN red lists) www.panda.org www.earthsendangered.com (this allows a search per country for species lists) www.nationsencyclopedia.com (information per country) www.animalinfo.org (information per country) www.conservationoutdoors.org (species search per country) www.nationalredlist.org (email info@nationalredlists.org)

RT&E Mammals are listed below, but complete lists can best be accessed via <u>www.earthsendangered.com</u> which will provide species lists per group.

Critically Endangered:

- Black Rhinoceros (Diceros bicornis).
- Desperate Shrew (Crocidura desperata). (Endemic to Tanzania.)
- Pemba Flying Fox (*Pteropus voeltzkowi*). (Endemic to Tanzania.)
- Peters's Musk Shrew (Crocidura gracilipes).
- Telford's Shrew (Crocidura telfordi). (Endemic to Tanzania.)

Endangered

- Aders' Duiker (Cephalophus adersi).
- Black-and-rufous Elephant Shrew (Rhynchocyon petersi).
- Blue Whale (Balaenoptera musculus).
- Chimpanzee (Pan troglodytes).
- Fin Whale (Balaenoptera physalus).
- Geata Mouse Shrew (Myosorex geata). (Endemic to Tanzania.)
- Giant African Water Shrew (Potamogale velox).
- Rondo Dwarf Galago (Galago rondoensis). (Endemic to Tanzania.)
- Sei Whale (Balaenoptera borealis).
- Wild Dog (Lycaon pictus).

Zanzibar Red Colobus (Procolobus kirkii). (Endemic to Tanzania.)

Vulnerable

- Abbott's Duiker (*Cephalophus spadix*). (Endemic to Tanzania.)
- African Elephant (Loxodonta africana).
- Checkered Sengi (Rhynchocyon cirnei).
- Cheetah (Acinonyx jubatus).
- **Dugong** (*Dugong dugon*).
- **Dwarf Multimammate Mouse** (*Mastomys pernanus*).
- East African Collared Fruit Bat (Myonycteris relicta).
- Eastern Tree Hyrax (Dendrohyrax validus).
- Elgon Shrew (Crocidura elgonius).
- Fischer's Shrew (Crocidura fischeri).
- **Highland Shrew** (*Crocidura allex*).
- Hildegarde's Tomb Bat (Taphozous hildergardeae).
- Howell's Shrew (Sylvisorex howelli). (Endemic to Tanzania.)
- <u>Humpback Whale</u> (Megaptera novaeangliae).
- Large-eared Free-tailed Bat (Otomops martiensseni).
- Lesser Hamster-rat (Beamys hindei).
- Lion (Panthera leo).
- Red Bush Squirrel (Paraxerus palliatus).
- **Rombo Shrew** (*Crocidura monax*).
- Sperm Whale (*Physeter catodon*).
- Spotted-necked Otter (Lutra maculicollis).
- Springhare (Pedetes capensis).
- Svynnerton's Bush Squirrel (Paraxerus vexillarius). (Endemic to Tanzania.)
- Tanzanian Shrew (Crocidura tansaniana). (Endemic to Tanzania.)
- Uhehe Red Colobus (*Procolobus gordonorum*). (Endemic to Tanzania.)
- Usambara Shrew (Crocidura usambarae). (Endemic to Tanzania.)
- Vermiculate Shrew (Crocidura xantippe

End of Standard
