

SGS CEBEC-CERTIFIED PRODUCTS

THERE IS NO SUBSTITUTE FOR SAFETY

Every consumer expects to buy a safe product. And why not? Would you ever dream of supplying a product that was anything less than completely safe? Proof that your product is safe reassures consumers. It helps your product to reach the market more quickly. And gives reassurance that your brand goes hand in hand with safety.

BE SURE OF SAFETY

There is no substitute for safety. This is why not just consumers, but also installation professionals and industrial users appreciate the CEBEC mark.

SGS CEBEC is an independent certification body for electrical and electronic products. We have the experience, insight and expertise to ensure your products meet national, European and international standards. The SGS CEBEC approval mark certifies compliance with the highest international standards for safety and quality. We work in conjunction with the CE mark, itself based on a Declaration of Conformity that is mandatory for electrical products on the European market.

Although we have our own state-of-the-art laboratories, SGS CEBEC can also conduct tests at your production locations through the Customers' Testing Facilities (CTFs) international procedure.

CONTINUITY OF CONFORMITY

We do more than test products. SGS CEBEC also inspects production facilities on a regular basis. We make sure that suitable safety tests are integrated into your production processes, ensuring your products will continue to comply with requirements.
